

SOUTHERN BOULEVARD BRIDGES REPLACEMENT PROJECT

Project Update
Thursday, November 5, 2020

Vehicle and pedestrian traffic will switch to the south side of the Southern Boulevard Causeway between the Southern Boulevard Temporary Bridge and State Road A1A on Friday, Nov. 6 (see attached map). In preparation for the traffic switch, traffic personnel will direct eastbound and westbound traffic west of State Road A1A at the tide relief bridge from 9:30 p.m. Thursday, Nov. 5, to 6 a.m. Friday, Nov. 6, to restripe a portion of the roadway. The traffic switch to the south side of the bridge and road will be completed by 6 a.m. Friday.

The Southern Boulevard (SR 80) Bridges Replacement Project includes replacing the existing bascule (draw) bridge and tide relief bridge over the ICWW and Lake Worth Lagoon between the City of West Palm Beach and the Town of Palm Beach. The project limits are between Washington Road in West Palm Beach and State Road A1A/South Ocean Boulevard in Palm Beach. New decorative lighting, pedestrian features, traffic signals, signage and drainage are included. A temporary bridge has been built north of the existing bridge to maintain traffic while the replacement bascule bridge is under construction. Active construction began April 3, 2017 and will last until summer 2021. The estimated construction cost is \$94 million.
